

How to upload an image during a telemedicine visit

- Select the camera + icon on the top left corner of your screen.

- Select the image you want to upload from your library, or take a live photo.

- This will take your video away from the visit momentarily. Your video connection will automatically resume after the image has been selected.
- The image can take several minutes to upload during a live telemedicine visit.

- To view the newly uploaded image, click on the images tab.

- These images you upload will be saved to the visit summary, and will be available to download once the visit has been completed.
